

Folio Integration Test Document

This is a test document used by the Folio integration test suite. It contains sample content about machine learning and cloud computing. The document is intentionally short to minimise ingestion time during testing. Topic: Introduction to serverless architecture on AWS. Key concepts: Lambda, API Gateway, DynamoDB, S3, Cognito. This document should produce a non-empty summary and allow chat questions.

Page 2: Summary

Serverless computing allows developers to build applications without managing servers. AWS Lambda runs code in response to events. DynamoDB provides fast NoSQL storage. S3 stores objects and triggers Lambda on upload.
